

# 2025 A chapter in the book: The Black Hole Information Paradox

Alejandro Perez and Sami wrote a chapter:

## **Planckian Discreteness and the Resolution of the BH Information Puzzle**

[https://link.springer.com/chapter/10.1007/978-981-96-6170-1\\_14](https://link.springer.com/chapter/10.1007/978-981-96-6170-1_14)

in the following book :

<https://link.springer.com/book/10.1007/978-981-96-6170-1>

Alejandro mentioned: "J'ai écrit une petite phrase au début du chapitre pour Sami. Je vois que la phrase est aussi visible en ligne sous le résumé"

PS: il y a un prix Nobel (Gerard 't'Hooft) parmi les auteurs (voir la liste des chapitres en bas de la page avec le lien ci dessus)"

During his PhD defense, Sami compared the black hole information paradox to a book going up in smoke, and asked whether it would then be possible to recover all the information contained in that book.
